- The Essex Region Children's Water Festival educates thousands of students about the critical importance of clean water to their future. Held annually during the last week of May/first week of June at the Canadian Transportation Museum and Heritage Village, the festival continues to be a smashing success. Elementary schools register their classes for a one-day field trip.
- Students experience hands-on activity centers which will teach them about water conservation, protection, science, technology, and attitudes. All activity centers are designed to meet the teaching objectives of the Ontario Curriculum. Most importantly, the festival is a FUN way for students to learn about our most valuable of resources – water.
- A French Immersion day is offered mid-week.
- Visit the website at <http://www.essexwaterfest.ca/>
- Please note, the CTMHV Curator does not organize this event.
