

To make a small zoetrope, use only one band of pictures, one black border, and the small circular base

1. Print out all components.
2. Cut out black borders and fold along dotted line. (Tape or glue the two sides together if necessary). (If making a large zoetrope, make two and tape or glue short sides together to lengthen).
3. Cut out bands of pictures, and circular base.
4. Tape or glue base of black border to the circular base.
5. Attach a straw or alternative stick to the center of the circular base. (Either on the bottom or inside the device).
6. Slide band of pictures into the device against the lower walls. (Add two of the same band of pictures on either side if you are making a large one).
7. Use the straw or stick to spin the device and watch the pictures move.
8. Change out the picture or try making your own!
