

Native Flowers to Southern Ontario

Cardinal Flower

Cardinal Flower is a tall, upright plant that can grow up to 4 feet tall, making it an excellent choice for adding height to your garden. Cardinal Flower thrives in moist soil and full sun to part shade. Blooms mid-July to September.

This flower attracts hummingbirds and butterflies!

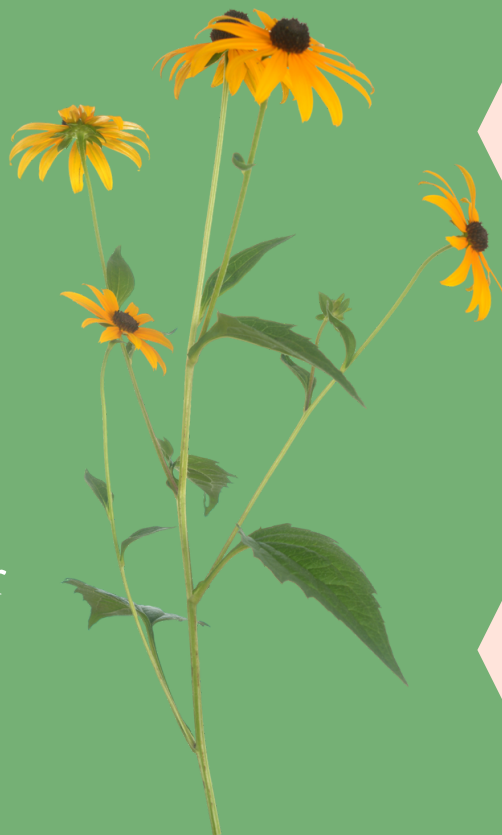

Rose Mallow

Rose Mallow is perfect for wet or boggy areas in your garden. With flowers that bloom from July to September, these flowers come in a range of colors, from white to pink to deep burgundy. Rose Mallows attract bees, butterflies, and hummingbirds!

Black-eyed Susan

Black-eyed Susan is a native wildflower that can thrive in both full sun and partial shade. The flowers of Black-eyed Susan bloom from early summer to frost and make a fantastic addition to cut flower arrangements. These flowers will attract bees and butterflies!

Wild Columbine

Wild columbine is a wildflower that produces delicate, bell-shaped flowers in late spring to early summer. This plant prefers to grow in full sun to partial shade. Wild columbine is an excellent choice for attracting hummingbirds and butterflies to your garden.

Wild Bergamot

Wild Bergamot is a fragrant native plant that prefers full sun to part shade. The flowers of Wild Bergamot bloom from mid-summer to early fall. Bergamot is also a popular choice for herbal teas. The leaves and flowers of the plant can be dried and used to make a flavorful and aromatic tea that is often used for medicinal purposes.

Wild Strawberry

Wild Strawberries can tolerate some shade, making it perfect for planting under trees or in rock gardens. The plant also produces white flowers in the spring that attract pollinators like bees and butterflies. In the summer, the flowers will bloom into edible fruit!
